

Mockup A:

- Enjoying the layout
- Good organization of information; very engaging
- I like the png cutout of Snoopy in the center
- I prefer the body text on this version
- Nav bar typeface could be used as the header typeface
- Prefer how the sources have their own page as opposed to just being in the footer

Mockup B (moving forward with this one):

- Prefer the white background
- Like this navigation bar better
- Would like to see the layout of Mockup A integrated into this version; this version is nice, but the other one is more visually engaging with more variety
- Since we're ditching the background sketch image idea, it might be fun to add some sketch-like pngs or drawings in the empty space of the page (see below)
